How To Invite A New User On TopSoil

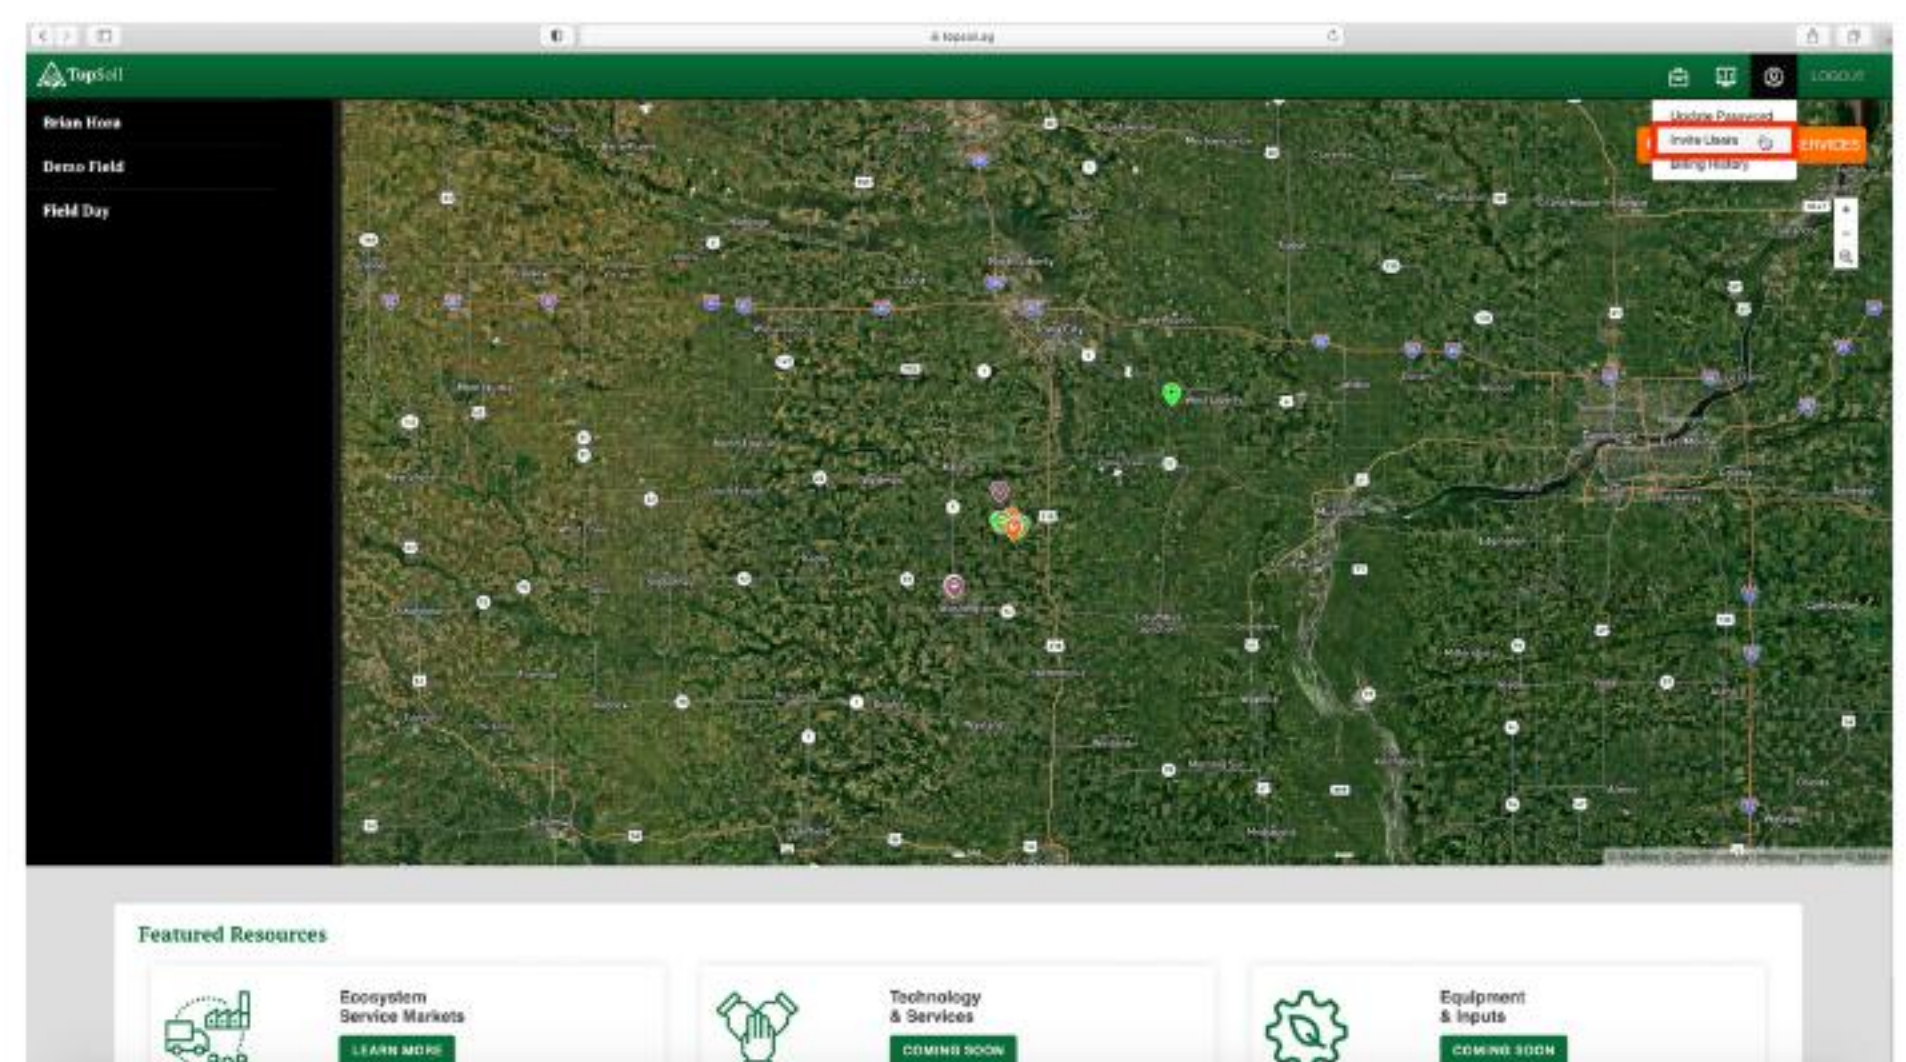

STEP 1

Open your TopSoil account and click on the person icon in the top right of the page.

STEP 2

Now click on the “invite users” option in the drop-down menu.

STEP 3

Now just fill in all of the information for the person you want to invite. You just need their name and email and a TopSoil representative will be in contact with them once they have made their own account.
