TopSoil Connect

Unlock the Value of Your Farm Data

Farmers deserve to be rewarded for their data. **TopSoil Connect** is your opportunity to turn field records into real financial value using our proprietary software, TopSoil.ag.

For \$3 an acre, farmers can gain access to powerful data management tools that connect their farm and position them to capitalize on evolving opportunities like 45Z and other sustainability initiatives.

Unlock the potential to **get paid for your data** while setting your farm up for even greater rewards in the future with TopSoil Connect.

What's Included?

Your Unaudited Biofuel Feedstock Reports (BFR)

Create BFR's to the specifics of the USDA and standardize your reports.

Locked-In Audit Fee to Certify Your Acres

Secure low participation or audit fees that may be required.

Access to Programs & Partners

Open doors to premium grain markets, tax incentives and preferred partner program.

Why TopSoil Connect?

- ✓ **Simple & Farmer Focused** - Easy-to-use software where you own & control your data.
- ✓ **Low Cost, High Value** - Only \$3/acre to get started with locked-in audit pricing to get verified.
- ✓ **Stay Ahead of the Market** - Position your farm for future opportunities.

How It Works

CREATE ACCOUNT

Complete your free farm profile in minutes

UNLOCK CI SCORE

View your CI Score and toggle scenarios

BUY TOPSOIL CONNECT

Low cost, low risk data management tools

ADD DATA

Input all field activities, to create your BFR

ATTEST

Confirm your data for program eligibility

CHOOSE A PROGRAM

Find the best fit for your operation to get max ROI

COMPLETE

Follow program rules to capture the value

FAQ

Frequently Asked Questions

How does TopSoil Connect benefit my farm? TopSoil Connect gives you the tools to manage your farm data and grants you access to programs that could pay for your efforts. While 45Z and other markets become solidified, you are making steps forward to capitalize on any emerging opportunity.

How much does it cost? TopSoil Connect costs \$3/acre.

How do I sign up? Create an account at TopSoil.ag and complete your farm profile.

What is the CI Score, and why does it matter? A CI Score is the carbon footprint score assigned to a bushel of grain, biofuel, or other product. Lower CI Scores can unlock better market opportunities, sustainability incentives, and tax benefits.

What is the Biofuel Feedstock Report (BFR)? The BFR is a concept proposed by the USDA. This report details your farm's agronomic practices, which is required for CI Scoring and participation in low-carbon grain programs. When you complete the TopSoil Connect program, you receive an unaudited BFR, which can be utilized when evaluating premium programs.

Do I need to complete an audit? An audit is not required to access your unaudited BFR. However, if you wish to participate in certain premium grain markets or programs, you may need to undergo an audit. TopSoil Connect customers will receive a discount on their audit costs or program fees.

How do I get paid for my farm data? Once you've signed up and entered your farm data, you can explore the available programs. These programs may offer premiums for low-CI grain, your generated carbon credits, or other sustainability-backed outcomes.

What kind of programs can I participate in? Programs continue to evolve, but may include: Low-CI grain contracts, premiums subsidized by the 45Z tax credit or other sustainability initiatives.

What happens if I don't choose a program? We think of this as an "options contract." If a program fits your farm the ROI could be substantial; however, taking control of your data is the real value.

What else is included? TopSoil Connect customers get special access to Continuum Ag's Preferred Partners. These companies could be helpful as you progress along your soil health journey.

Get your farm connected today by unlocking the potential to get paid for your data with TopSoil Connect.
